TO WHOM IT MAY CONCERN

In reply to , query on Azo Dyestuff, we would like to inform you that none of the dyestuffs used by us contain any azo amines as banned by German Consumer production Act.

We hereby certify that the products being marketed by us comply with Oeko-Tex Standard 100 norms (Edition/ Ausgabe 01/2015), GOTS (General Organic Textile Standard) & REACH (Restriction, Evaluation & Authorisation of Chemical Substances).

Besides dyestuffs, the eco-profiles of finished textiles depend upon other variables like substrate, pre and post treatment chemicals, finishing agents and also on the process based in the processing of textiles.

Due to limitation of the present analytical test methods for identification of banned amines, textile articles dyed using some of the dyes may show false positive result for PCA/PPD/4-amino biphenyl though neither PCA/PPD nor 4-amino biphenyl are used in synthesis of dyes.

The information is based on our general experience and test on samples of typical manufacture. It does not absolve the user from making their own tests and controls to ensure that the finished textile article conforms to the requirements of the European Standard.

Thanking you, we remain,

Sincerely yours,

For: Dakali Industrial Marketing Pte. Ltd.,
